

Body of Evidence

Each program is a unique experience as you join Dr. Menton for an exploration of the human body. He utilizes a life-size torso of the human body to **investigate the location and structure of numerous organs**. Is there an organ that you're curious about? Ask about it. Dr. Menton is able to talk about many different organs, especially whatever workshop participants are interested in. He also displays slides of actual organ tissues onto a high resolution monitor for all to see God's special design for each organ.
