

The Hearing Ear & the Seeing Eye

So how DO our senses sense? Why don't your ears see, and why can't you hear with your fingers? Did all this just happen? Take a FUNtastic trip with Dr. Menton into the marvelous intricacies of the human ear and hear about the unique elements that enable human sight. Both of these amazing features were bestowed by God on the last of the six days of creation and bear the **clear stamp** of the Creator.
