

Three Ways to Make an Apeman

Did you know that there are only three ways to make an apeman? Far from being ancestors of human-kind, apemen must be constructed in one of three ways. Come to the Creation Museum to learn about these supposed missing links.

Dr. Menton will teach you how to **recognize the difference between humans and apes**. You will then test your ability to distinguish those “apemen” that are really apes from those that are really humans. He will leave no doubt that the famous “Lucy” fossils belong to a knuckle-walking apelike creature!
